Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/597,695	Applicant(s) NAKAMURA, AKIO	
	Examiner Phyllis G. Spivack	Art Unit 1614	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

Applicant's Preliminary Amendment filed August 3, 2006 is acknowledged.

Updated priority data are noted.

Claims 1-3 are presented. Claim 1 is a compound claim. Claims 2 and 3 are composition claims. There are no method claims.

An Information Disclosure Statement filed August 3, 2006 is further acknowledged. The references have been considered to the extent each is presented in the English language.

A complete list of co-pending and related applications is requested when Applicant responds to this Office Action.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sztaricskai et al., Arch. Pharm. and Medicinal Chemistry.

Sztaricskai teaches O- β -D-glucopyranosides of 5-aminosalicylic acid (5-ASA). See Compound 28, 5-amino-2-(β -D-galactopyranosyloxy) methyl benzoate, at the top of page 323. The depicted compound encompasses both α and β forms. Preparation of the methyl ester compound is disclosed at the bottom of the first column on page 325. When compared to 5-ASA, the glycoside, i.e., compound 28, is shown to be more stable, exhibiting one hundred times the solubility of the parent compound. Further, compound 28 was found to be one and a half times less toxic than 5-ASA. The claims

Art Unit: 1614

differ in that the acid form of the compound is claimed, while the reference is directed to the methyl ester. See page 324 including Tables 1 and 2.

However, one skilled in the art of formulation chemistry would have been motivated to seek the ester in the preparation of pharmaceutical medicaments. Such would have been obvious in the absence of evidence to the contrary because lower esters, such as methyl ester, are very soluble in water.

No claim is allowed.
